Montserrat Ortiz

Querétaro, México • +52 55 4499 5549 • montseortiz29@gmail.com • LinkedIn

PROFILE

Frontend Developer with more than 4 years building production interfaces with React, Next.js, TypeScript and Tailwind CSS, integrated with REST APIs. Experience improving performance, accessibility and SEO (mobile Lighthouse up to 100/95/100) and working in full stack architectures. I adapt quickly to new stacks and deliver quality features in agile environments.

WORK EXPERIENCE

2025 – Present

Frontend Developer (Freelance), Independiente · Querétaro, México

- I built and deployed Library Diary and WOD Tracker with React, Next.js and TypeScript.
- I integrated REST APIs and SSR in both full stack applications, end to end.
- I optimized WOD Tracker to 100 in performance, 95 in accessibility and 100 in mobile SEO.

2023 – 2025

Full Stack Developer, X Eleva · Querétaro, México

- I developed more than 10 full stack applications for clients from different sectors with React and TypeScript, integrating REST APIs under the Scrum methodology.
- I optimized frontends in several projects through themed components and CSS frameworks, reducing by ~30% the implementation time of frequent visual changes.
- I implemented in OxProx package- and account-type-based permissions, controlling access to pages according to the user role.

2021 – 2023

Full Stack Developer and Programming Instructor, DEV.F · Querétaro, México

- I developed the campus app with React, Context API and MongoDB, integrating a REST API so students could consult classes and upload projects.
- I optimized images, CSS, accessibility and SEO through alternative texts and metadata provided by the team.
- I wrote unit tests with Jest in a CI/CD pipeline with a minimum coverage of 75%; mentored more than 60 students.

2019 – 2020

Frontend Developer, Soy Agencia · México

- I developed more than 20 responsive landing pages mainly with HTML and CSS, applying performance optimization (image compression, lazy loading).
- I converted Figma and Zeplin designs into web implementations faithful to the design, working under agile Scrum methodologies.

EDUCATION

2020 – 2021

Master's in Full Stack Web Development, DEV.F · México

- Intensive training in full stack web development with modern JavaScript, React, Node.js and relational databases.
- Building web applications from scratch, from frontend component design to the creation and consumption of REST APIs.
- Practice with version control using Git/GitHub, collaborative work and deployment of projects to production.

2018 – 2020

Master's in Administration, Specialization in International Logistics, Universidad del Valle de México · México

- Focus on international logistics, supply chain management and process optimization.
- Development of projects oriented toward operational efficiency, basic data analysis and decision-making based on indicators.
- Teamwork and executive presentations of proposals for improving logistics processes.

2018 – 2019

Web Development Bootcamp, Ironhack · México

- Intensive web development bootcamp with the MERN stack (MongoDB, Express, React, Node.js).
- Building full stack applications, from interface design in React to API creation with Node.js/Express and persistence in MongoDB.
- Teamwork in short sprints, focused on delivering MVPs and presenting final projects to a technical panel.

2013 – 2016

Bachelor's in International Business, Universidad del Valle de México · México

- Training in foreign trade, international business and operations management between different markets.
- Development of projects focused on market analysis, import/export processes and cost optimization.
- Multidisciplinary teamwork and presentations of business proposals to executive profiles.

SKILLS

Frontend	React • TypeScript • JavaScript (ES6+) • Tailwind CSS • Next.js • Redux • React Hooks • React Context • React Server Components • Web performance optimization • Web accessibility • Technical SEO • Lighthouse • Material UI • Ant Design • UI design systems • Server-side rendering • Static site generation • Advanced state management
Backend	Node.js • Express • Design and Integration of REST APIs • REST • Authentication and authorization • JWT • OAuth 2.0
Databases	SQL • MySQL • Relational Databases
Containers	Docker
Autonomous Full Stack Work	Problem Solving in Frontend, Backend and Data Integration, Without Constant Supervision
Testing and CI/CD	Jest • Continuous Integration Pipelines with Test Coverage Gates • React Testing Library • CI/CD
AI Applied to Development	Claude Code • ChatGPT • GitHub Copilot
Other	Version control
